

ORAL CANCER AWARENESS

2 minutes could *save* your life.

Oral cancer is one of the most underdiagnosed cancers — largely because early symptoms look ordinary. Take a free, private risk check while you wait.

**10 quick questions**

Based on real clinical risk factors — takes about 2 minutes on your phone.

**Completely private**

Nothing is saved or sent anywhere. Your answers stay on your device.

**Know your risk level**

Get a personalized summary and guidance on what to do next.

**Find affordable care nearby**

Connects you to free and low-cost clinics, dental schools, and community health centers.
